# Sylvan of Edwardsville Course Descriptions

## Personal Tutoring

(Grades PreK - 12)

Sylvan's personal approach in reading, math, algebra and writing can set your child up for success for the next school year and for life. Our hours are flexible and programs are developed on your personal needs and goals.

## Advanced Study Skills

(Grades 4- 12)

Kids learn how to set goals and how to get organized and manage time effectively to reach goals. They acquire strategies for their unique learning style and get ready to take on challenges with confidence.

## Homework Help

(Grades 1- 12)

Students bring in school work and get personal support from a trained professional. Our teachers help them understand challenging topics while motivating independence and self-learning techniques.

## Math Edge

(Grades 1-5)

Monthly memberships help boost speed and accuracy while developing independent learning and problem solving skills. Students also work on engaging "brain booster" math games to help master math in a fun way.

## High School Math Homework Help

(Grades 9- 12)

When students struggle in math concepts, our math expert can help. We ensure your child not only understands homework concepts, but also learns how to apply those skills for a deeper level of learning.

## Robotics 101

(Grades 2-5)

A lively introduction to building and programming robots using LEGO®.

## Robotics 102

(Grades 2-5)

A continued exploration of pulleys and gears through the creation of new LEGO® robots.

## Robotics 201

(Grades 4-8)

Build sophisticated bots using LEGO® for advanced problem solving and engineering.

## Robotics 202

(Grades 4-8)

An advanced robotics program using LEGO® to build problem solving and engineering skills.

## Game Design 101

(Grades 2-5)

An introduction to programming through video game creation and animation design.

## Game Design 102

(Grades 2-5)

Build on our 101 course with more advanced animations, games and special effects.

## Game Design 201

(Grades 5-8)

An introduction to programming that includes animated players, music and sound effects to build complex multi-level games.

## Game Design 202

(Grades 5-8)

Build on our 201 course with more advanced programming principles — complete with game logic and physics.

## Advanced Reading Strategies

(8-12)

College-bound teens can master strategic reading skills to improve speed and comprehension for entrance exams and to prepare larger workloads ahead.

## SAT or ACT Prep

(9-12)

We give teens the skills, strategies, and practice needed to score high on college entrance exams.

## College Prep Writing

(8-12)

Write effective and compelling college application essays and develop strategic writing skills to tackle advanced research assignments.
